Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown  
Comments:

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The UAA was conducted in July and no WBCR was observed. The stream met the maximum depth requirement in 3 of 4 sites and the average depth requirement in 2 of 4 sites. An interview revealed that the stream was dry much of the year at site 3. Because the creek had several large pools, the committee recommends retaining the WBCR designation. For additional information, refer to UAA # 0509 that was also conducted on this stream and resulted in the same recommendation.

**Committee Recommendation:** ☒ Retain Use ☐ Modify Use ☐ Remove Use ☐ Inconclusive
